

RIVERSIDE COUNTY
WATER
TASK FORCE

Decision Time: California WaterFix

Riverside County Water Task Force Speaker Series

Friday, July 21, 2017

7:30 a.m. — 9:00 a.m.

Western Municipal Water District
 14205 Meridian Parkway, Riverside, CA 92518

Modernizing and improving California’s water system is essential as much of southern California, including the Inland Empire relies on imported water supplies from the Sacramento and San-Joaquin Delta. After decades of review, planning and rigorous scientific and environmental analysis, critical decisions are being made on needed modernizations to this critical water supply system. Come hear from project experts on where we are in the regulatory decision making process and how the public is responding.

Roger Patterson, Assistant General Manager overseeing strategic water initiatives for Metropolitan Water District of Southern California. Mr. Patterson will provide an update on where the California WaterFix is in the permitting cycle and what recent state and federal decisions mean for the project.

Fiona Hutton, Communications strategist for Southern California Water Committee will provide a preview of the organization’s education and outreach campaign and recent polling on California WaterFix.

Free to attend!
Continental breakfast will be served

RSVP to Danielle Coats
(951) 928-3777, ext. 4526, coatsd@emwd.org
